WORLD ECONOMY
Tsoy A.V. Geo-economic competition of leading countries in Central Asia ......................... 97
The formation and subsequent development of the integration institutions has to be indicated as a regularity of the globalization of the world economy. The countries entering into the regional integration groups form the megaregion. The European megaregion has accumulated the considerable experience in the field of the formation of the integration institutions. That experience should be theoretically generalized and practically used in the process of the development of such relatively new megaregion in the global economic space, as the Shanghai Cooperation Organization.

Key words: institutional economy, integration institutions, economic integration, megaregions, globalization, Shanghai Cooperation Organization, European Union.

In case of insufficient revenue base to Finance the implementation of powers of state authorities, as well as the need to improve the efficiency of government expenditure, there is a need in the non-state sources of funding and use management experience of business structures in the development of transport infrastructure in the country. One solution to this problem can be public-private partnership (PPP).

This article deals with the main factor of the attractiveness of PPPs to the state directly related to the goals and objectives of the state development of infrastructure and various sectors of the
economy (transport, energy), as well as social stability and the satisfaction of citizens ‘ needs (social, communal sphere). To effectively address these challenges, the PPP state is advisable to attract expertise, experience and funds of investors.

Key words: transport infrastructure, public-private partnership, investment project, airport holding, private investor, payback period, net present value.
